

EXPERIMENT – 8:

NAME: ADHITHYA S

ROLL NO: 240701017

AIM: The aim is to create storyboards representing the user flow for a **CPU Store** mobile application using Balsamiq.

Procedure: 1. **Tool Used:** Balsamiq Wireframes (<https://balsamiq.com>) 2. Created a new project and added mobile screens to simulate the user's shopping experience for computer hardware. 3. Each screen represents a key step in browsing, reviewing technical specifications, and purchasing CPUs. 4. UI components like buttons, text fields, icons, and product cards were used from the Balsamiq library. 5. Designed wireframes to be simple, clean, and user-friendly for a seamless e-commerce experience.

User Flow: 1. **Home Screen (Product Listing)** – Users can browse available CPUs, view prices, and quickly add items to their cart. 2. **Product Details Screen** – Displays in-depth technical specifications like clock speed, core count, and socket type. 3. **Shopping Cart Screen** – Allows users to review selected items, adjust quantities, and see the price breakdown. 4. **Checkout Screen** – Users enter shipping information, select payment methods, and confirm their order.

1. Home Screen

Components:

- Navigation bar with "CPU Store" title and Shopping Cart icon.
- Product cards containing placeholder images for CPUs.
- Product titles (e.g., CPU Name 1, 2, 3) and pricing.
- "View Details" and "Add to Cart" action buttons for each item.
- Bottom navigation menu (Home, Cart, Account).

Purpose: Acts as the main catalog for users to discover different processors and start their shopping journey.

2. Product Details Screen

Components:

- Large product image placeholder.
- Detailed technical specs: Model, Clock Speed, Cores/Threads, Socket Type, and Chipset Compatibility.
- Primary "Add to Cart" button.
- Secondary "Back to List" button for easy navigation.

Purpose: Provides complete technical information about a specific CPU to help the user make an informed buying decision.

3. Shopping Cart Screen

Components:

- Itemized list of selected products (e.g., Intel Core i9, AMD Ryzen 9).
- Quantity (Qty), Unit Price, and Total Price per line item.
- Grand Total calculation.
- "Proceed to Checkout" and "Continue Shopping" buttons.

Purpose: Allows users to manage their selections and see the final cost before payment.

CPU Store

Shopping Cart

Intel Core i9-12900K	Qty : 1	Unit Price: \$589.99	Total: \$589.99
AMD Ryzen 9 5950X	Qty : 2	Unit Price: \$799.00	Total: \$1598.00
NVIDIA GeForce RTX 3080 (Placeholder)	Qty : 1	Unit Price: \$699.00	Total: \$699.00

Grand Total: \$2886.99

4. Checkout Screen

Components:

- Shipping Information form (Name, Address, Email, Phone Number).
- Payment Method dropdown selector.
- Order Summary section showing final items and the Grand Total.
- Prominent "Confirm Order" button.

Purpose: Collects necessary delivery and payment details to finalize the transaction.

Final Result: The wireframes successfully represent a **CPU Store App**, showing how users can:

- Discover and browse high-performance processors.
- Analyze detailed hardware specifications.
- Manage a digital shopping cart.
- Complete a structured checkout process for hardware purchases.
